NEW HORIZONS IN ENVIRONMENTAL ECONOMICS

General Editors: Wallace E. Oates, Professor of Economics, University of Maryland, USA and Henk Folmer, Professor of General Economics, Wageningen University and Professor of Environmental Economics, Tilburg University, The Netherlands

This important series is designed to make a significant contribution to the development of the principles and practices of environmental economics. It includes both theoretical and empirical work. International in scope, it addresses issues of current and future concern in both East and West and in developed and developing countries.

The main purpose of the series is to create a forum for the publication of high quality work and to show how economic analysis can make a contribution to understanding and resolving the environmental problems confronting the world in the twenty-first century.

Recent titles in the series include:

Game Theory and International Environmental Cooperation
Michael Finus

Sustainable Small-scale Forestry
Socio-economic Analysis and Policy
Edited by S.R. Harrison, J.L. Herbohn and K.F. Herbohn

Environmental Economics and Public Policy
Selected Papers of Robert N. Stavins, 1988-1999
Robert N. Stavins

International Environmental Externalities and the Double Dividend
Sebastian Killinger

Global Emissions Trading
Key Issues for Industrialized Countries
Edited by Suzi Kerr

The Choice Modelling Approach to Environmental Valuation
Edited by Jeff Bennett and Russell Blamey

Uncertainty and the Environment
Implications for Decision Making and Environmental Policy
Richard A. Young

Global Warming and the American Economy
A Regional Assessment of Climate Change Impacts
Edited by Robert Mendelsohn

The International Yearbook of Environmental and Resource Economics 2001/2002
A Survey of Current Issues
Edited by Henk Folmer and Tom Tietenberg

Sustainable Farm Forestry in the Tropics
Social and Economic Analysis and Policy
Edited by S.R. Harrison and J.L. Herbohn

The Economic Value of Water Quality
Edited by John C. Bergstrom, Kevin J. Boyle and Gregory L. Poe

The Choice Modelling Approach to Environmental Valuation

Edited by

Jeff Bennett
Professor of Environmental Management, National Centre for Development Studies, The Australian National University, Australia

Russell Blamey
Programme Visitor, Research School of Social Sciences, The Australian National University, Australia

NEW HORIZONS IN ENVIRONMENTAL ECONOMICS

Contents

List of Figures vii
List of Tables viii
List of Contributors x
Acknowledgements xiii

1. Introduction
   Jeff Bennett and Russell Blamey 1

PART ONE: THE TECHNIQUE

2. Choice Experiments: an Overview of Concepts and Issues
   Jordan 1. Louviere 13

PART TWO: CASE STUDIES

3. Some Fundamentals of Environmental Choice Modelling
   Jeff Bennett and Vic Adamowicz 37

   Jenny Gordon, Ross Chapman and Russell Blamey 73

5. Remnant Vegetation and Wetlands Protection: Non-market Valuation
   Jeff Bennett, John Rolfe and Mark Morrison 93

6. Green Product Choice
   Russell Blamey, Jeff Bennett, Jordan J. Louviere and Mark Morrison 115

PART THREE: EXPLORING SOME METHODOLOGICAL ISSUES

7. Choice Set Design
   Russell Blamey, Jordan J. Louviere and Jeff Bennett 133

8. Opt-out Alternatives and Anglers' Stated Preferences
   Melissa Ruby Banzhaf, F. Reed Johnson and Kristy E. Mathews 157
Contributors

Vie Adamowicz is a professor in the Department of Rural Economy, University of Alberta and an Adjunct Professor in the Department of Economics, University of Alberta. He is also currently the Program Leader of the Sustainable Forest Management Network of Centres of Excellence, a research network with an annual budget of over $5 million and one of Canada’s 18 Networks of Centres of Excellence. He received his PhD from the University of Minnesota and MSc and BSc degrees from the University of Alberta. His main research areas include environmental benefits estimation, economic assessment of environmental changes and consumer choice modelling.

Melissa Ruby Banzhaf received her BA in economics from Duke University and currently is a PhD student in economics at the University of North Carolina at Chapel Hill. Previously, she was on the staff of Triangle Economic Research in Durham, North Carolina, where she conducted research in environmental and health economics.

Jeff Bennett is Professor of Environmental Management in the National Centre for Development Studies at the Australian National University and is a Visiting Fellow at the University of New South Wales. He holds an honours degree in agricultural economics from the University of New England and a PhD from the Australian National University. He has published widely in environmental and resource economics and has been at the forefront of the development of non-market valuation techniques in Australia. Jeff is also a director of Wetland Care Australia, a not-for-profit company that carries out wetland protection and rehabilitation works.

Russell Blamey is a Senior Research Officer with the Australian Health Insurance Commission in Canberra. Previously, he was a Research Fellow in the Research School of Social Sciences at the Australian National University, where he researched stated preference methods such as choice modelling and contingent valuation. He also recently lead a major research project examining the potential use in environmental management of discursive processes such as the citizens’ jury. He has also worked as a Research Fellow at the University of New South Wales, and as a Research Officer for the Bureau of Tourism Research and the Queensland Department of Primary Industries. He received his PhD from the Australian National University.

Ross Chapman is Manager of the Sydney office of the Centre for International Economics (CIE). He was formerly Dean of the Economic Department at the University of New South Wales. During much of the 1990s, he participated in several projects undertaken by the CIE including reviews of the regulation of firms in Indonesia, financial sector regulation in Zimbabwe and the regulation and pricing of water in the Sydney region. Ross has also served as an Associate Commissioner with the Industry Commission on inquiries into waste recycling and water policy. He has completed a large number of projects in the area of contracting out and the private supply of infrastructure services, especially water.

Jenny Gordon has been with the Centre for International Economics since February 1995. She was formerly an Assistant Professor in the United States, having completed her PhD at Harvard University in 1993. Jenny has conducted extensive work in the areas of electricity markets, agroforestry, environment, health care and social analysis such as the role of women in agriculture and factors influencing sustainable management in the rangelands. International economics and development is her other main area of expertise. Since joining the CIE Jenny has built on her previous research work in the areas of international financial markets and trade, including developing agendas for improved economic governance, long term growth modelling and exchange rate forecasting.

F. Reed Johnson is Vice-President for Research and Development at Triangle Economic Research in Durham, North Carolina. He has been a member of the economic faculties at the US Naval Academy, Illinois State University, Simon Fraser University, and the Stockholm School of Economics. He also worked as a staff economist in the Offices of Policy Analysis at both the US Department of the Interior and the US Environmental Protection Agency.

Jordan J. Louviere received his PhD from the University of Iowa in 1973. Since then he has taught at Florida State University, the University of Wyoming, the University of Iowa, the University of Utah, the University of Alberta, the Australian Graduate School of Management and the University of Sydney. Since 1993 Jordan has been involved in a variety of research activities in environmental and resource economics and health economics; he currently is Senior Research Officer in the Centre for Health Economics.
Research and Evaluation (CHERE) and Chief Scientist at Memetrics, Proprietary, Limited in Sydney, Australia. Jordan has published more than 100 papers in leading academic journals, chapters in books and proceedings. His research has largely been concerned with design, analysis and modelling of human judgement, decision making and choice behaviour, including theory, methods, experimental design and the external validity of such methods and models. Jordan’s work has been published and applied in human geography, transportation planning and research, marketing, environmental and resource economics and health economics.

Kristy E. Mathews is a Senior Economist at Triangle Economic Research in Durham, North Carolina, where she conducts non-market valuation studies. Previously, she was a research economist in the Natural Resource Valuation and Assessment program at Research Triangle Institute. She received her BA from Alma College and her MA in economics from the George Washington University.

Mark Morrison is a lecturer at Charles Sturt University where he teaches both economics and marketing. He has worked as an economist for the State Government as well as for several economic consulting firms. He has completed a Bachelor of Economics (Honours) at Macquarie University and a PhD at the University of New South Wales. His principal research interests are environmental economics, economic evaluation, market research and health economics.

John Rolfe is a resource economist who is Research Coordinator for the Central Queensland University at Emerald. He has a commerce degree and an economics degree with first class honours, both from the University of Queensland, and a doctorate in economics from the University of New South Wales. John has a number of research interests in natural resource management, agriculture and regional development. He has a background on the land and, with his family, operates a large cattle property in the Central Highlands region of Queensland.

Acknowledgments

A primary driver for the preparation of this volume was a research project aimed at the development of Choice Modelling as a tool for the estimation of non-market, environmental values. The project, which stretched over the period from 1996 to 2000, was funded by the Land and Water Resources Research and Development Corporation, Environment Australia, New South Wales Environment Protection Authority, New South Wales National Parks and Wildlife Service, Queensland Department of Primary Industries and Queensland Department of Natural Resources. The Australian Centre for International Agricultural Research is also acknowledged for funding precursory work on stated preference techniques. Particular thanks must go to Jill Kenna for her diligence and good natured patience in preparing this manuscript. The continued love and support of our respective spouses Ngaire and Karen has made this endeavour possible.
